Databases:	MongoDB

PROJECTS / OPEN-SOURCE

LocateNow | Link   *HTML, CSS, Javascript*

LocateNow is your go-to destination for real-time location tracking, providing a seamless and intuitive platform to monitor the whereabouts of your devices, assets, or loved ones. Whether you're a concerned parent, a business owner managing a fleet of vehicles, or simply looking to keep tabs on your belongings, LocateNow offers a reliable and efficient solution.

KEY FEATURES:

1. Real-Time Tracking: Thanks to our advanced GPS technology, keep track of your devices or individuals with pinpoint accuracy. Watch their movements unfold in real time on our interactive map interface.

2. Geofencing Alerts: Set up customized geofences around specific areas and receive instant email or push notifications whenever a tracked entity enters or exits these predefined zones.

3. History Playback: Review past routes and movements with our comprehensive history playback feature. Analyze travel patterns, identify trends, and gain valuable insights into past activities.

4. User-Friendly Interface: Our intuitive interface makes it easy for users of all levels to navigate and utilize our tracking platform effectively. Accessible on both desktop and mobile devices for convenience on the go.
